**Supporting pupils with medical conditions**

## Medical Conditions Policy

### Supporting Students with Special Medical Needs

#### **Definition**

Students' medical needs may be broadly summarised as being of two types:

- (a) Short-term affecting their participation in school activities which they are on a course of medication.
- (b) Long-term potentially limiting their access to education and requiring extra care and support (deemed special medical needs).

#### **Rationale**

Schools have a responsibility for the health and safety of students in their care. The Health and Safety at Work Act 1974 makes employers responsible for the health and safety of employees and anyone else on the premises. In the case of students with special medical needs, the responsibility of the employer is to make sure that safety measures cover the needs of all students at the school. This may mean making special arrangements for particular students who may be more at risk than their classmates. Individual procedures may be required. The employer is responsible for making sure that relevant staff know about and are, if necessary, trained to provide any additional support these students may need.

The Children and Families Act 2014, from September 2014, places a duty on schools to make arrangements for children with medical conditions. Students with special medical needs have the same right of admission to school as other children and cannot be refused admission or excluded from school on medical grounds alone. However, teachers and other school staff in charge of students have a common law duty to act *in loco parentis* and may need to take swift action in an emergency. This duty also extends to teachers leading activities taking place off the school site. This could extend to a need to administer medicine.

The prime responsibility for a child's health lies with the parent who is responsible for the child's medication and should supply the school with information. The school encourages self-administration of medication when possible. A copy of this policy is available to parents.

## **Aims**

The school aims to:

- assist parents in providing medical care for their children;
- educate staff and children in respect of special medical needs;
- adopt and implement The Children and Families Act 2014 in relation to Medication in Schools;
- arrange training where identified to support individual students;
- liaise as necessary with medical services in support of the individual student;
- ensure access to full education if possible.
- monitor and keep appropriate records.

## **Entitlement**

The school accepts that students with medical needs should be assisted if at all possible and that they have a right to the full education available to other students.

The school believes that students with medical needs should be enabled to have full attendance and receive necessary proper care and support.

The school accepts all employees have rights in relation to supporting students with medical needs as follows:

- choose whether or not they are prepared to be involved;
- receive appropriate training;
- work to clear guidelines;
- have concerns about legal liability;
- bring to the attention of management any concern or matter relating to supporting students with medical needs.

## **Expectations**

It is expected that:

- parents will be encouraged to co-operate in training children to self-administer medication if this is practicable and that members of staff will only be asked to be involved if there is no alternative;

- where parents have asked the school to administer the medication for their child they must ask the pharmacist to supply any such medication to be dispensed in a separate container, containing only the quantity required for school use. The prescription and dosage regime should be typed or printed clearly on the outside. The school will only administer medicines in which the dosage is required during a school day. The name of the pharmacist should be visible. Any medications not presented properly will not be accepted by school staff. Students should not bring in their own medicine. This should be brought into school by the parent.
- employees will consider carefully their response to requests to assist with the giving of medication or supervision of self-medication and that they will consider each request separately.
- the school will liaise with their professional health partners for advice about a student's special medical needs, and will seek support from the relevant practitioners where necessary and in the interests of the student.
- any medicines brought into school by the staff e.g. headache tablets, inhalers for personal use should be stored in an appropriate place and kept out of the reach of the students. Any staff medicine is the responsibility of the individual concerned and not the school.

### **Policy into Practice**

There is a need for proper documentation at all stages when considering the issue of support for students with medical needs in school.

## Contacting emergency services

**Request an ambulance - dial 999, ask for an ambulance and be ready with the information below.**

**Speak clearly and slowly and be ready to repeat information if asked.**

1. your telephone number
2. your name
3. your location as follows **Jubilee High School, School Lane, Addlestone, Surrey**
4. state the postcode i.e. **KT15 1TE** - please note that postcodes for satellite navigation systems may differ from the postal code
5. provide the exact location of the patient within the school setting
6. provide the name of the child and a brief description of their symptoms
7. inform Ambulance Control of the best entrance to use and state that the crew will be met and taken to the patient
8. put a completed copy of this form by the phone

## **Model letter inviting parents to contribute to individual healthcare plan development**

Dear Parent

### **DEVELOPING AN INDIVIDUAL HEALTHCARE PLAN FOR YOUR CHILD**

Thank you for informing us of your child's medical condition. I enclose a copy of the school's policy for supporting students at school with medical conditions for your information.

A central requirement of the policy is for an individual healthcare plan to be prepared, setting out what support each student needs and how this will be provided. Individual healthcare plans are developed in partnership between the school, parents, students, and the relevant healthcare professional who can advise on your child's case. The aim is to ensure that we know how to support your child effectively and to provide clarity about what needs to be done, when and by whom. Although individual healthcare plans are likely to be helpful in the majority of cases, it is possible that not all children will require one. We will need to make judgements about how your child's medical condition impacts on their ability to participate fully in school life, and the level of detail within plans will depend on the complexity of their condition and the degree of support needed.

A meeting to start the process of developing your child's individual health care plan has been scheduled for xx/xx/xx. I hope that this is convenient for you and would be grateful if you could confirm whether you are able to attend. The meeting will involve [the following people]. Please let us know if you would like us to invite another medical practitioner, healthcare professional or specialist and provide any other evidence you would like us to consider at the meeting as soon as possible.

If you are unable to attend, it would be helpful if you could complete the attached individual healthcare plan template and return it, together with any relevant evidence, for consideration at the meeting. I [or another member of staff involved in plan development or student support] would be happy for you contact me [them] by email or to speak by phone if this would be helpful.

Yours sincerely
